Large Paperboard Converter Adds Mainsaver Supply Chain Modules

San Diego, CA – January 5, 2017: Huhtamaki's Fulton, NY plan produces paper cups and ice cream containers for the North American Retail and Consumer markets. For over 10 years, this large manufacturing facility in North Central New York has used Mainsaver for asset and work management. While Mainsaver is used to manage corrective and preventive work orders, a separate system was used to purchase and track maintenance, repair and overhaul (MRO) parts. In 2016, Huhtamaki and Mainsaver embarked on a project to migrate the purchasing and inventory operations from the (no longer supported) legacy system to Mainsaver.

The integration of the asset and work order data with the spare parts data provides direct benefits to the Maintenance organization. Mainsaver will build spare parts lists to the assets as parts are consumed and track usage patterns. Over 25 Maintenance trades are able to search for parts by part number, description, manufacturer, supplier, keywords and those parts already associated with the subject machine. Maintenance trades can also see past parts usage and determine if a part is on order if not in stock.

Mainsaver provided the turn-key services to convert the supplier, purchase order and inventory data from the legacy system to the Mainsaver database. Users were trained and a test conversion was performed in order to replicate and optimize existing MRO supply chain processes. One specific improvement is the ability to instantly email a purchase order to the supplier.

Mainsaver is also integrated to Huhtamaki's financial software in order to provide seamless integration from the purchase or maintenance materials and services to the matching of the invoice. Mainsaver has provided this same common platform to other Huhtamaki North American plants resulting in optimized supply chain operations for the Maintenance organizations.

About Huhtamaki

At Huhtamaki, we're global specialists in packaging for food and drink, dedicated to making every consumer experience enjoyable, consistent, and safe.

We understand that packaging is about so much more than just what goes round a product. It's about building brands, protecting reputation, and opening up new opportunities in new markets. That's why we're on hand, around the world, working as long-term partners to our customers as they develop and grow.

Wherever we are, we adapt and deliver packaging that meets local demands. We work efficiently and with respect for the world around us, demonstrating our values every day – always providing quality products with reliable service.

Helping great products reach more people, more easily.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established

CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
