

Missouri River Energy Services (MRES)  
Enterprise Mainsaver Upgrade and addition of Mainsaver Connect

**San Diego, CA – March 21, 2017:** Missouri River Energy Services implemented Mainsaver asset management software in 2015 to maintain the assets across their disparate fleet of power generation and transmission equipment. The multi-plant structure of the single Mainsaver enterprise database allows both common and discreet data values based on the desired functionality. In January 2017, MRES upgraded their Mainsaver client to version 12.8 which offers an updated user interface. They also added Mainsaver Connect Mobility which is a browser based work management tool in the Mainsaver Suite which may be used on tablets. Mainsaver Professional Services provided onsite upgrade and training services.

The asset fleet consists of fossil, wind and hydro generation facilities, a headquarters building and Transmission/Distribution equipment. Mainsaver is used for corrective work orders and the preventive maintenance program. Spare parts are maintained in Mainsaver and purchasing is done as well. An interface to the financial system will exchange key data electronically reducing duplicate entry in place today.

Mainsaver 12.8 also provides an incident module to record any type of operational event such as extreme weather or onsite visitors. The architecture of the database allows operations personnel at each production facility or the headquarters control room to enter events and determine any follow-up action which might be needed. The events along with Maintenance costs and history provide overall documentation on asset operation.

**About Missouri River Energy Services (MRES)**

Missouri River Energy Services (MRES) is an organization of 60 member municipalities that own and operate their own electric distribution systems. MRES is governed by a 13-member board of directors who are elected by and from the ranks of our member representatives. MRES is dedicated to supplying its members with reliable, cost-effective, long-term energy and energy services in a fiscally responsible and environmentally sensitive manner. MRES is an extension of its members, and through joint action, members will remain competitive while enhancing their relationships with their customers

**About Mainsaver**

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
