Mainsaver Software and SQL Projekt AG announce Joint Partnership delivering Artificial Intelligence Capabilities to Enterprise Asset Management

Combination of the Mainsaver Software and the SQL Projekt AG, TransConnect® Business Integration Platform supports advanced decision making capabilities to maintenance operations.

Dresden, Germany, and San Diego, CA – April 12, 2017: Mainsaver Software and SQL Projekt AG are pleased to announce the signing of a Partnership Agreement focused on the integration of the TransConnect ® Business Integration Platform with the Mainsaver Enterprise Asset Management software program. The combination of these systems will combine advanced business intelligence capabilities and streamline decisions for maintenance operations.

TransConnect® is an Enterprise focused universal integration server for on line integration supporting message based and bi-directional communication. Eliminating "spaghetti" integration, TransConnect® reduces the number of interfaces by introducing a central integration platform and includes a transport system to distribute data objects. Routing systems are used to control the data transfer and are configurable by XML. TransConnect$^{®}$ also contains mapping systems to adjust data structures of the integrated applications and can be configured using XML for data transformation.

TransConnect$^{®}$ offers a wide variety of adapters, making it possible to link a variety of different systems. Database adapters for relational database systems, and Web and E-Mail-adapters provide access to internet systems. The TransConnect$^{®}$ - SAP-adapter integrates an SAP-System using ALE-, BAPI- or RFC-Interfaces.

Leveraging the advanced business intelligence from TransConnect® with Mainsaver, users will have the ability to integrate Predictive Maintenance capabilities into their Mainsaver based maintenance operations. As data from the growing number of devices available via the IoT come on-line, the combination of these products will continually increase operational efficiency and reduce cost and overhead.

About SQL Projekt AG

Building on long-standing, successful development work, SQL Projekt AG is a specialized provider of consulting, development and training services in the field of databases. Customized solutions are developed both in the classical client / server architecture as well as in the intranet or the Internet.

SQL Projekt AG is the authorized partner of Sybase , SAP® and other technology providers. Based on our own know-how and these partnerships, optimal advice is provided for all phases of the software lifecycle and all products of our sales program.

SQL Projekt AG has successfully implemented many interesting projects for well-known customers in business and administration. By cooperating with technology partners and research institutes it is possible to prepare top-of-the-range technologies for heterogeneous hard- and software environments.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
