

King and Prince Seafood Implements Mainsaver Connect

San Diego, CA – June 28, 2018: Mainsaver Software continues to expand its Mobile CMMS footprint with a recent deployment of Mainsaver Connect at King and Prince Seafood in Brunswick, GA and Redmond, Washington. King and Prince is a division of Nissui, the 2nd largest seafood company in the world, and produces a broad portfolio of seafood products for the food industry, to include fish, shrimp, calamari, and crab products.

K&P Seafood currently utilizes the core Mainsaver application to manage its Maintenance processes, as well as its procurement and management of MRO spare parts inventory. With the addition of Mainsaver Connect, K&P will take spare parts inventory management to the next level by implementing barcoded part transactions utilizing mobile devices. MRO stock room clerks will use Bluetooth barcode scanners in conjunction with Mainsaver Connect for issuing spare parts to work orders, as well as performing routine physical inventories of the stock room. In both cases, stock room efficiency will be greatly enhanced.

About King and Prince Seafood

King and Prince Seafood is a division of Nissui, the 2nd largest seafood company in the world. The company has been a leader in seafood products for the food services industry for over 65 years, with 3 production facilities in the United States. The company is unmatched in quality and reliability, recently receiving the 2014 Quiznos supplier of the year award, as well as a Bronze Supplier Award from Sysco. The company strictly adheres to the Global Standard for Food Safety, the benchmark for best practices in the food industry.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
