

Luz Solar Selects Mainsaver

San Diego, CA – October 10, 2018: Mainsaver Software announced today it has expanded its presence in the clean energy industry, as it has been selected by Luz Solar Partners as the enterprise asset management solution for its Harper Lake Solar Power Plant in Hinkley, CA. The solar farm produces approximately 89-MW of clean energy for the state of California and will utilize Mainsaver for managing its preventive and corrective maintenance programs as well as inventory procurement and purchasing. As part of the implementation, Mainsaver will provide a comprehensive data conversion from an existing system. This will ensure smooth continuity of operation as well as preserve historical asset, maintenance, and purchasing data for future reference. The site is expected to go live on Mainsaver in Mid-November.

About Mainsaver Software

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
