

Mainsaver Asset Management Software Transcends Technology Evolution at North Carolina Plant

San Diego, CA. and Whitsett, NC, July 20, 2018; Mainsaver Software recently worked with the Zink Holdings manufacturing facility in North Carolina to upgrade the Mainsaver Enterprise Asset Management software to version 12.9. Starting life in 1989 as a 356,000 square foot manufacturing facility for light sensitive photography paper, the large facility has been transformed into a modern facility to produce zero ink color thermal paper. Mainsaver has been with this plant since its early life as a Konica Minolta facility.

The process to produce light sensitive photographic papers and this new printing paper are closely parallel in they both involve coating paper with a chemical solution, converting the rolls of paper to appropriate sizes and packaging. Back in the days of photographic paper production half of the plant had to be kept in the dark creating special challenges for the maintenance and operations organizations.

The people, processes and equipment have changed over the years at this plant but Mainsaver has adapted and is still in use today. Mainsaver is used for corrective and preventive maintenance and spare parts inventory. Mainsaver is an important tool for Zink in achieving their quality certifications. Another initiative is the organization of the stockroom and disposal of spare parts no longer under in the plant. Mainsaver data will provide input for this process.

About Zink Holdings

ZINK Holdings LLC is the inventor of the ZINK® Technology and the manufacturer of the award-winning ZINK Paper®, the first new fundamentally disruptive printing technology in nearly 30 years. ZINK®, which stands for Zero Ink®, is a full-color printing system that eliminates the need for ink cartridges or ribbons; all the color required for printing an image or text is embedded in the ZINK Paper® itself.

ZINK Holdings LLC is an independent company that is pioneering ink-free printing for consumer and business needs. There are over 170 patents and patents pending supporting the technology. Next generation R&D continues in our labs daily. ZINK Holdings research and development labs and headquarters are in Massachusetts, with a state of the art development and manufacturing facility in Whitsett, North Carolina.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the

industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
